

ICT SERVICE PROVIDERS

Information and Communications Technology (ICT) is a generic term that includes any communication device or application, it includes; radio, television, cellular phones, computer and network hardware and software, satellite systems and so on, as well as the various services and applications associated with them, such as video conferencing and distance learning.

Through ICT, MSMEs have an advantage of advertising and marketing their business to a big number of customers; and also MSMEs can communicate easily and get quick feedback based on the nature and quality of service or product given.

There are different ICT service providers covering a wide range of services to their customers based on the customers' needs and requirements. The following are some of the ICT service providers in Tanzania.
